DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by either DE-C-196 11 062 or US-A-5 500 274. The German reference, col. 3, lines 1-65; col. 6, lines 40-65 and col. 10, lines 5-55 and the US patent columns 7 and 8 disclose a method of determining direction-dependent properties of coatings essentially as claimed. It is the examiner's opinion that applicants' claims are anticipated by the process of either reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE-C-196 11 062 or US-A-5 500 274 for the same reasons as urged in the above paragraph. It is the examiner's opinion that these dependent claims are conventional and do not render these claim unobvious.

Claim Rejections - 35 USC § 112

Claims 1-10 are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are vague and indefinite in that they do not define one process step.
